PROFESSIONAL SUMMARY

Computer Science Engineering student (2nd Year) at SRM Institute of Science and Technology with hands-on experience building full-stack web applications, desktop tools, and games. Proficient in Python, Java, C/C++, MySQL, and JavaScript with demonstrated ability to deliver end-to-end solutions across diverse problem domains. Passionate about practical software development and continuous skill-building.

EDUCATION

B.Tech – Computer Science Engineering	2023 – Present
SRM Institute of Science and Technology, Chennai 2nd Year, 4th Semester	
Class XII (Higher Secondary)	2023
Score: 70%	
Class X (Secondary)	2021
Score: 69.7%	

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++
Web Development: HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, Basic Frontend Architecture
Database: MySQL, CRUD Operations, Structured Data Handling
Tools & Platforms: Git, GitHub, VS Code, Vercel, GitHub Pages
Core Concepts: Object-Oriented Programming, Data Structures, DBMS, Software Development Lifecycle
Specialized: Full Stack Development, Desktop Application Development, Game Development (Pygame), Secure Data Handling, Inventory & Billing Systems, Personal Finance Systems

PROJECTS

Crime Database Management System	Full Stack Web Application
- Developed a full-stack web application to store, manage, and retrieve crime records efficiently using MySQL CRUD operations. - Designed modules for case entry, record updates, search, and filtering with frontend-backend integration. - Focused on data organization and quick retrieval for administrative use.	
Textile Billing Software	Desktop Application
- Built an offline billing system for small retail shops with bill generation, product entry, price calculation, and stock updates. - Designed an intuitive UI for non-technical users and incorporated inventory logic to track product quantity and sales.	
Enhanced Flappy Bird Game	Python – Pygame
- Developed a modular game using Pygame with collision detection, scoring system, and dynamic difficulty scaling. - Added smooth animations, sound effects, and improved controls; structured with OOP for scalability and performance.	
Advocate Utility Software	Desktop Tool
- Created a desktop application to manage legal case records, client details, and document references. - Reduced manual record-keeping with structured data storage and easy retrieval features for legal professionals.	

Advanced Finance Tracker

Personal Finance System

- Developed a personal finance management system tracking income, expenses, and savings with categorized insights.
- Designed monthly summary and spending analysis logic using structured data handling for efficient record management.

EMPTY KEYS – Passkey Manager

Python Security Tool

- Built a secure password manager with basic encryption to store and retrieve user credentials safely.
- Implemented add, update, and access functionality with a focus on data security and usability.

ACHIEVEMENTS & CERTIFICATIONS

- Completed multiple online courses in programming, software development, and related technical domains.
- Consistently built and shipped end-to-end projects across web, desktop, game, and security domains.

EXTRACURRICULAR ACTIVITIES

- Boxing – demonstrates discipline, focus, and consistency in high-pressure situations.
- Leadership and event organizing experience in college-level activities.

STRENGTHS

- Strong interest in learning, building, and iterating on technical projects.
- Problem-solving mindset with a practical, hands-on approach.
- Adaptability and consistency across diverse technical challenges.
